XP3-C, Compact Intermittent

(US Patent No. 7,209,806)

- Maintains a constant static head pressure on the well being produced
- Increases well & field production
- Low maintenance and low initial cost saves the operator time and money
- Process status at a glance. With the switch-gauge indicating the actual reading and set-points, the operator instantly knows the conditions of the process.
- High and low set-points are easily adjusted without the need for special testing equipment.
- Three way solenoid valve rated to 100 PSI (150 PSI optional) can directly drive a pneumatic actuator.
- Optional auxillary solar power system can be paired with the intermitter to operate at fields that require high cyclic rates
- Certified suitable for operating in Class 1 Div 2 Hazardous Areas
- Rated to operate from -40°C to +85°C ambient temperature.
- Design features Axiom's standard time proven electronics
